

Neumont College of Computer Science | Mock Interview Personal Assessment for Students

The survey will take approximately 6 minutes to complete.

Complete a personal assessment of your interview/meeting by submitting your responses to the following questions on this form. This component of the Mock Interview assignment is worth 5 points total.

(!) To receive credit for this portion of this assignment, you must upload a PDF of the completed form to the LMS assignment. A PDF copy is available for download after submission.

Remember that there are no right or wrong answers to any of these questions and prompts. The most important component to this assignment is that you answer with honesty and integrity as you reflect on your experiences during the mock interview.

Basic Information

1. Date of interview: *

2/20/2024

2. Your First Name *

As listed in the LMS course.

Michael

3. Your Last Name *

As listed in the LMS course.

Bates

4. Select the current quarter: *

☒ Q1 - Winter

☐ Q2 - Spring

☐ Q3 - Summer

☐ Q4 - Fall

5. Select the EP course in which you are currently enrolled: *

☒ PRO490

☐ PRO491

☐ PRO492

6. Enter your EP sponsor company: *

AdvancedMD

7. Select your degree program: *

BSSE

Interview Personal Reflection & Assessment

8. Name of interviewer(s) and their job title(s): *

Separate multiple interviewers with a semicolon.

(Example: Amy Whittaker, Career Services Manager; Christy Wagner, Career Services Coordinator)

Jared Doerr- Head of the QA Department

9. Provide details of the length and format of the interview. *

The interview was really casual, we hopped in a call, we were both early so we talked for a bit then got started, it lasted about 40mins to a little over 1 hour

10. Overall, what do you think you did well in this interview? *

Super mid (5 or 6 out of 10).

I had to reschedule my interview, and I had entirely forgotten about it until about 40 mins before, so I had no prep.

I strongly feel the need to have more mock interviews, and to actually prepare for them.

A question I was asked was "What's any time you solved a problem creatively", and I had no response and I still don't. I know I have solved loads of things creatively, but I can't for the life of me think of anything good even days later.

11. Was there a technical component to your interview? *

☒ Yes

☐ No

12. If you answered yes, describe the task and how it went: *

I was given a leap year task. I wish it had went better, but I think it was the most ok part of my interview.

I got a little mixed up with the numbers, I am generally better at string manipulation questions than I am the math adjacent ones.

13. Were there specific questions and aspects of the interview that were challenging and/or you can improve upon? *

Be sure to include any feedback/suggestions offered by your interviewer in addition to your own self-assessment.

1. Being Prepared
2. Having Examples already in my head (same as 1?)
3. Practice more Coding Challenges

14. What are 1 or 2 interview skills that you can realistically commit to improving upon before your next interview? *

Reflect on your response to Question 13 and try to think about specific action-oriented activities/tasks that are achievable. Be prepared to discuss with Amy Whittaker in your 1:1 meeting.

Applicable stories and examples as well as not pointing out mistakes.

I kept showing that I *know* what good behavior is, but acknowledge that I am not there. This is a bad habit

Enterprise Project

15. Did you review your Enterprise Project performance? *

☒ Yes

☐ No

16. If you answered yes, provide a brief recap of key takeaways discussed with your sponsor. *

Include any and all relevant takeaways applicable to your professional development, growth, and goals.

We briefly talked about how he wants to get me again next quarter.

I expressed interest, but after talking to some other people I'm thinking I might not want to due to the hiring freeze going on over there.
